

Juan Esteban Mosquera Perea

Full-Stack Developer | Backend Developer

Medellín, Colombia | +57 310 425 0789 | juamosque1@gmail.com | LinkedIn | GitHub

SUMMARY

Full-Stack Developer and Systems Engineering student with hands-on experience designing, building, testing, and deploying web applications and REST APIs. Proficient in Java, Go, TypeScript, React, Next.js, Python, and FastAPI, with experience in relational databases, authentication, Docker, CI/CD, and cloud deployment. Strong interest in backend engineering, fintech, software architecture, clean code, and reliable production-oriented systems.

EDUCATION

Universidad de Antioquia

B.Sc. in Systems Engineering – 8th of 10 semesters

Talento Tech

Data Analysis Bootcamp

Medellín, Colombia

2023 – Present

Colombia

2026

EXPERIENCE

Academic Monitor – Fundamentals of Data Science

Universidad de Antioquia

2026 – Present

Medellín, Colombia

- Provided academic support to undergraduate students in data science fundamentals, programming, data analysis, and technical communication.
- Explained technical concepts and assisted students in solving programming and data analysis problems.

PROJECTS

Founder & Solo Developer – VoiceFlowAI | *Next.js, TypeScript, FastAPI, Python, Docker* [Live Demo]

2026

- Developed and deployed an end-to-end AI voice tutor platform, managing the complete development lifecycle from concept to production.
- Architected a full-stack Voice AI system using Next.js, TypeScript, FastAPI, and Python, integrating LLM APIs for multi-turn conversations.
- Integrated ElevenLabs TTS with US, UK, and Australian accents and browser speech recognition for hands-free interaction.
- Containerized the backend with Docker and deployed the backend on Render and frontend on Vercel.

Full-Stack Developer – Embedded Payments Platform | *Java, Spring Boot, Vue 3, JWT* [Live Demo]

2026

- Designed and developed a full-stack payments platform covering merchant management, payment intents, transactions, refunds, and embedded checkout.
- Implemented dual authentication using JWT for users and API Keys for merchant integrations with role-based access control.
- Designed a layered architecture separating domain, application, and infrastructure concerns to improve testability and maintainability.
- Designed REST APIs and documented endpoints with Swagger/OpenAPI for external integrations.

Full-Stack Developer – UdeA Innova Academic Platform | *React, Node.js, REST APIs* [Live Demo]

2025

- Developed a multi-screen academic web application with authentication, dashboards, and role-based views.
- Built reusable React components and integrated RESTful APIs using Node.js and JSON-based communication.
- Collaborated using Git and GitHub with feature branches, pull requests, and team-based development workflows.

Full-Stack Developer – Banking Simulation Platform | *Java, React, MariaDB, Scrum*

2024

- Led the full-stack development of a banking management web application following Scrum methodology.
- Developed Java backend services for business logic and HTTP requests and integrated MariaDB for SQL/CRUD operations.

TECHNICAL SKILLS

Languages: Java, Go, Python, JavaScript, TypeScript, SQL

Backend: Spring Boot, FastAPI, Node.js, Express, REST APIs

Frontend: React, Next.js, Vue.js, Angular

Databases: PostgreSQL, MySQL, MariaDB, MongoDB

APIs & Security: REST, JSON, JWT, API Keys, OAuth, Swagger/OpenAPI

Testing: Jest, React Testing Library, Go testing, httptest, Unit Testing

DevOps & Cloud: Docker, Git, GitHub Actions, CI/CD, Vercel, Render

AI & Data: LLM APIs, Claude API, GitHub Copilot, Data Analysis

Methodologies: Agile, Scrum, Pull Requests, Git-based Development

LANGUAGES

Spanish: Native

English: B2+ (Upper-Intermediate)
